

ROMMELSBACHER

PROGRAMME
2016/2017

EXPERIENCE & INNOVATION FOR ALMOST 90 YEARS

Gustav Rommelsbacher

A lot has happened since the foundation of Rommelsbacher Company in 1928 by Dipl. Ing. Gustav Rommelsbacher, starting with cast iron heating plates under the brand "robusta" through to today's internationally known programme of small electrical appliances for kitchen and household.

Meanwhile, our medium-sized family enterprise is run by the third generation and led into the future with innovative ideas and dynamics.

"robusta" matured to "Rommelsbacher" – an assortment balanced between tradition and modern spirit, new trends and established products. Rommelsbacher is an expert for electrical single and double cooking plates and also produces them in Germany. With such a unique assortment of cooking plates we are successful all over the world: whether with the smallest automatic cooking plate in the world or a high-tech induction cooking plate with glass and stainless steel.

Over the years, the range has been expanded by attractive device groups. Rommelsbacher has set standards by picking up international trends and current highlights, but also by expanding traditional product lines and developing novelties made in Germany.

ROMMELSBACHER
PURE COOKING PLEASURE

From the beginning Rommelsbacher brand committed itself to a high quality standard. This attitude as well as a dedicated team, reliable service and flexible reaction on customer requests has been making us successful on the markets at home and abroad for decades.

With interesting novelties and the development of innovative cooking sectors such as "fun cooking", "healthy cuisine", "economic preservation" we will commit ourselves to the production site Germany and occupy a firm position in the sector "cultivated hospitality" with the Rommelsbacher range also in future.

- foils made of food safe 2-layer material
- maximum protection against freezer burn
- robust, patented quality, extremely tear-resistant
- high, direct suction effect due to impressed air ducts
- best material properties for unbroken, air-tight and firm sealing seams
- can be heated up to 100 °C, also perfect for sous vide cooking
- for storage in refrigerator and freezer
- for heating in hot water and microwave
- washable (also in the dishwasher) and reusable

MULTI GRATER

MR 6

Useful battery operation – cordless and flexible use wherever needed. For grating hard cheese, nuts, baking chocolate and much more...

- power battery (NiMH) with 1,800 mAh performance for long run time
- stainless steel grater drum, removable for easy cleaning
- ergonomic handle for a safe feeding
- convenient on/off push button, integrated safety switch
- separate charger with power cord

Independent of any wall socket, this attractive appliance can be used directly at the table, e.g. for grinding hard cheese freshly onto the pasta dish or rasping chocolate over your sundae. There is a small lid for closing the drum compartment, so that residues cannot fall out. High ease of use, which grants much fun at the table!
