MAIN BENEFITS

SIGNIFICANT INCREASE OF YOUR PINEAPPLE SALES

Many customers do not buy fresh pineapples because the slicing demands too much work.

100 % CONTACTLESS

The pineapple gets sliced without requiring any contact between the user and the machine.

EASY TO USE

The self-service use is very simple and takes only 3 steps.

The customer places the pineapple jar at the therefore foreseen place.

The customer slides the pineapple into the machine on the therefore foreseen place

The customer collects the jar with the sliced pineapple and closes it with the therefore foreseen lid.

EXTERIOR SCREEN FOR CUSTOMERS

The screen at the top of the machine allows you to loop a video, seen by your customers. This continuous animation stimulates sales and allows communication on various topics:

- The easy use of the machine (tutorial that illustrates the 3 steps)
- In-store promotion
- Ecological containers
- The origin of the pineapples

INTERIOR SCREEN FOR OPERATORS

The interior screen accessible by operators, is very useful as it gives access to the user manual, clearly explaining the different steps of assembly and disassembly.

EASY AND QUICK CLEANING

Daily cleaning is very easy and only takes 15 minutes. All spare-parts can be washed in the dishwasher.

PERMANENT ANIMATION OF FRESH CUTTING IN STORE

The customer chooses the pineapple he wants to buy and slides it into the machine himself. Through the machine window, he sees the pineapple being peeled and sliced. These types of animations are more and more sought by store managers, in order to deal with online sales competition.

READY TO EAT

The heart of the pineapple is cut by the machine so that the slices can be consumed immediately and without any difficulty. With the rounded edge of a wooden fork, it is very easy to cut pieces of pineapple and to eat them directly out of the jar.
